Notice of Commencement of Operation of “Slot Program Play System” through Devices Associated with Company Casino

Universal Entertainment Corporation (hereinafter referred to as the “Company”) hereby announces that it has successfully developed the casino industry’s first system that enables casino slot machines to be installed with preferred customer service functions, and that the Company has commenced the world’s first operation of this system at “Okada Manilla,” the integrated resort (IR) facility operated by Tiger Resort, Leisure & Entertainment, Inc. in Manila, the Philippines.

[System Overview]

The “Slot Program Play System” makes it possible to provide preferred customer services independently configured by casino operators to players who insert a certain amount of money or more in a casino slot machine within a certain period of time. It does so by systemizing the rolling programs that have been conventionally administered as preferred customer services at baccarat and other table games.

At present, this system has been installed in casino slot machines placed on the VIP floor of Okada Manila, offering players with free gameplay and point rewards. The Company is considering to expand the areas where the system is operated going forward.

Introducing this system helps casino operators boost their marketing for capturing repeat slot customers, and also offers advantages to slot players by allowing them to benefit from unprecedented preferred services.

As exhibited by this Slot Program Play System as well as the “Multi Currency System” announced on July 19, 2019, it is the policy of the Company to leverage to the maximum extent its proprietary technological development prowess as a manufacturer of amusement machines for the Japanese market and the advantages that it enjoys as the parent of a corporate group containing an IR casino operator in order to expand its casino-related operations going forward.
